

Dear all customers:

January, 2020
KAIJO Corporation
Bonder Machinery Division

Regarding cut clamp overhaul of End of maintenance support model

Thank you very much for your using Kaijo machines.

We announce that we discontinue the overhaul of the cut clamp for the following end of maintenance support model and only repair is available hereafter.

① Type of cut clamp

Machine model	Production end date	Support end date	Type of cut clamp
FB-170/700	End of March 2007	End of March 2014	C50A
FB-180/780	End of May 2011	End of May 2018	C70A
FB-880	End of September 2012	End of September 2019	C80(C70A)

② Current Overhaul

Kaijo checks the condition of the cut clamp which customers sent, and replaces cables and consumable parts. After passing the operation check, Kaijo sends it back. The overhaul price is determined depends on the components which needs to be repaired.

③ Future Repair Support

At the same time as replacing components with new components except a linear actuator, the linear actuator cable is replaced with a new one. Kaijo checks the operation and send it back after inspection passed. Repair charge needs to be changed because Kaijo replaces with new ones instead of repairs.

If the linear actuator is defective, Kaijo suggests a new cut clamp instead of overhaul. If you decline to purchase new one, please note that Kaijo charges an inspection cost and shipping cost.

④ Scheduled Start Date

From April 1, 2020

⑤ New Cut clamp Sales

Since the production of the linear actuators has been discontinued, the sale ends when all the stock has been sold.

⑥ New Cut clamp Sales (Without Linear Actuator)

New cut clamps without the linear actuator are possible to purchase.

⑦ Sales of a Single Unit of Linear Actuator

Kaijo cannot sell only linear actuators, as Kaijo needs them for new cut clamps.

Thank you for your understanding. Please contact us if you have any questions.
